

**SYSTEM AND METHOD FOR PROVIDING LOCATION-SPECIFIC
SERVICES TO MOBILE USERS USING AN IP NETWORK**

ABSTRACT

[0034] A telecommunications system (10) supporting load sharing between a Public Land Mobile Network (8) and an Internet Protocol network (14) within a shared service area (20) includes an air interface to the IP network (14) for providing IP network service to mobile terminals (28a, 28b). Location-specific services to PLMN mobile terminals in the service area supported by the IP network are enabled.
